

questions for formulating significant learning goals

A year (or more) after this course is over, I want and hope that students will love learning. They will enjoy researching and gaining knowledge independently as well as share what they have learned with others whether that is through writing, discussions or through the use of technology.

My Big Hairy Audacious Goal (BHAG) for the course is
Learners will create informational text to share with others beyond our classroom.

FOUNDATIONAL KNOWLEDGE

Writers select things they know all about so they can teach others.

Writers plan and write information in an organized way.

Writers reread and revise by elaborating to improve books.

KidRex and books are a source of information.

How to use basic skills on Google Slides such as changing theme, adding text and adding images.

APPLICATION GOALS

Students will need to think creatively about how they are going to present the information they have learned within their informational writing.

Students will learn to type, write and read to research and create informational piece.

Students will learn the writing process and steps to share learning with others.

INTEGRATION GOALS

Students should realize how important it is to learn to read. This is how they can gather more information.

Students should also realize how important it is to sound words out when writing or typing.

Students will learn that you can use technology to communicate and collaborate out to others beyond the classroom.

HUMAN DIMENSION GOALS

Students will be able to see how creative they can be when making their own book.

They will be able to expand their growth mindset when trying something new and persevering when reading and writing become challenging.

Students will learn how to use technology to communicate and collaborate with other people to deepen understanding and share learning.

CARING GOALS

I hope students will develop a love of learning and will feel excited to do further research and learning independently, using the tools and strategies they have learned.

"LEARNING HOW TO LEARN" GOALS

I would like students to learn to have a growth mindset, to persevere when things get difficult, to never stop learning and growing & to continue to research, collaborate and communicate beyond this course.
